

Transact at the speed of the internet

Exchange US dollars for Paxos Standard tokens to move money anywhere, anytime Paxos Standard combines the stability of the dollar with the efficiency of blockchain technology

TRUSTED

Paxos is a Trust company, regulated by the New York State Department of Financial Services, with deep experience as an intermediary between fiat and digital assets. Paxos Standard is the first digital asset issued by a financial institution, and is fully collateralized by USD.

NO FEES

No conversion fees, no PAX transaction fees, no redemption fees and no minimums or limits for purchases or redemptions.

AUDITED

The entire supply of PAX is collateralized by USD in dedicated omnibus cash accounts at FDIC-insured U.S. banks, and audited each month by Withum, a nationally ranked auditing firm.

STABLE

PAX will always be redeemable one-to-one with USD (1 PAX = \$1 USD), providing a stable and common currency for digital transactions.

FASTEST REDEMPTIONS

Paxos provides the fastest redemption of any stablecoin, with redemptions processed within 3.5 hours on average.

SUPPORTED

Our global team provides customer service 24/7. Get a dedicated account manager with minimum purchase of \$100K.

PRESS

Highlights from media coverage of Paxos Standard:

These approvals demonstrate that companies can create change and strong standards of compliance within a strong state regulatory framework that safeguards regulated entities and protects consumers.

In the current marketplace, the biggest hindrances to digital asset adoption is trust and volatility. As a regulated trust with a 1:1 dollar-collateralized stablecoin, we believe we are offering an asset that improves on the utility of money.

PAX is the early leader among its upstart competitors... regularly outpacing its peers in both average daily trading volume and velocity of money, that is, the ratio of its daily turnover to market cap.

The biggest thing this is doing is solving the plumbing issues in the crypto space. Our business is trust. We're not just doing this off some very light forms of regulation.
